

Changes to Diabetic Medication Step Therapy:

Effective July 1, 2019, the step therapy for the following Diabetic Medications is changing. The new lookback for medication fills of metformin, glyburide, or glipizide is increasing to a fill quantity of 90 day supply in the prior 365 days. If this step is met, the following medications will pay without intervention. If this step is not met, a request will need to be submitted for prior approval review.

Diabetic Medications Requiring Step Therapy:

- Farxiga
- Januvia
- Jardiance
- Trulicity
- Xigduo XR
- Glyxambi
- Janumet
- Janumet XR
- Ozempic
- Victoza

Patients currently on these medications will not experience interruptions when filling their current prescription. This applies to new starts only. Any current approvals on file for these medications will continue through the approval end date.
